PAINTWORX® Water-Based is a high quality, water based decorative acrylic based paint. Its specially developed water based formula has lower VOC content, low odour and lower toxicity making it a better choice for those looking for an environmentally considerate product*.

It has a high gloss finish, excellent adhesion and high durability and is ideal for painting furniture, household accessories, arts and crafts. It is suitable for DIY interior and exterior decorative projects around the home.

*When compared to other solvent based paint systems.

With lighter colours, multiple coats may be required after application of an appropriate primer/undercoat.

Frosted Glass

- Easy to use application
- Quick drying
- Etched glass finish
- Ideal for DIY glass projects

PAINTWORX® Frosted Glass is the easy to use, decorative paint of choice for a smooth etched glass finish for your DIY glass projects.

PAINTWORX® Frosted Glass is a decorative spray paint creating an etched glass look, while still allowing light to transmit through the painted surface. It is ideal for decorating glass ornaments around the home and great for creating instant privacy on glass windows and doors.

- Quick drying
- Heat resistant paint
- 100% silicone resin based
- Durable matt finish

PAINTWORX® Hi Temp is a quick drying, heat resistant paint for use on metal surfaces exposed to high heat. The premium quality heat resistant paint is specifically designed to withstand temperatures up to 650°C.

It is 100% silicone resin based creating a durable matt finish. It is designed especially for use on metal surfaces, subject to extreme heat such as: boilers, exhausts, manifolds, BBQ and stove surrounds. **Do not use on BBQ hot plates, oven interior surfaces, food contact surfaces or commercial applications.**
