

**Makita**

# 18V Brushless Chainsaw 250mm (10")

DUC254

**BRUSHLESS**

## **WHEN POWER MEANS BUSINESS**

When you choose Makita Outdoor Power Equipment, you choose to be part of something bigger. Our complete line up of cordless outdoor solutions will revolutionise the way you work - empowering you with over a century of knowledge and expertise in crafting the world's most reliable tools. With the support of the world's largest 18V cordless system, you can be sure our Power Garden range will get the job done and more - no petrol or cord needed.

# Product Overview

# Product Specification Sheet

Voltage		18V
Guide bar length		250mm (10")
Saw chain	Type	90PX
	Gauge	1.1mm / 0.043"
	Pitch	3/8"
Chain speed		1,440m/min
Oil tank capacity		140ml
Weight:		2.8kg

- **Brushless motor** – powerful brushless motor produces more power and longer runtimes than brushed motors
- **XPT** – for use in outdoor applications, protection from dust and dripping water is enhanced protecting the circuitry
- **Torque Boost Mode** – used for cutting thicker branches, the torque will increase to 50% more cutting efficiency.
- **Metal spike bumper** – firmly grips the workpiece to provide more control, making cutting easier
- **Automatic chain lubrication** – the amount of chain oil can be regulated allowing the user to make adjustments based on whether they are cutting hard or softwood
- **Captive nut** – eliminates losing the nut when replacing the guide bar
- **Climbing Ring** - allows the chainsaw to be connected connecting to an arborist's harness
- **Chip distributor** - ensures that the wood chips are directed away from the blade

# Advantages

## Performance

Brushless Motor delivering high levels of performance

## Innovation

Unbelievable performance thanks to Boost Torque Mode

## Convenience

Climbing Ring

## Ergonomics

Top Handle Design for ease of use

# Advantages

## Makita's high performance Outer rotor brushless motor

Thanks to the new outer rotor brushless motor the DUC254 is able to produce more power and more efficiency than ever before.

The new design means the stator rotates and the armature remains stationary, making the motor a highly efficient direct drive system

**BL**  
**MOTOR**

# Advantages

## **XPT – eXtreme Protection Technology**

This technology has been designed for use in outdoor applications or harsh environments. XPT provides increased protection for the circuitry from dust and dripping water.

This is achieved by carefully sealing and protecting internal components so that they stay free from exposure of dust and moisture.

***XPT***  
***EXTREME PROTECTION TECHNOLOGY***

The logo features the letters 'XPT' in a large, bold, italicized font with a thick black outline. Below it, the words 'EXTREME PROTECTION TECHNOLOGY' are written in a smaller, bold, italicized, all-caps font.

# Advantages

## Torque Boost Mode

Hold the main power button down for 2 seconds to start the Chainsaw, the light will turn yellow. You can use the tool in the Torque Boost mode up to 30 seconds depending on the usage conditions.

# Frequently Asked Question

## **What does it mean when the main power lamp flashes yellow?**

If the main power lamp flashes yellow when the main power switch is pressed for a few seconds, this means the Torque Boost mode is not available.

The Torque Boost mode is not available right after cutting. Wait for 10 seconds, and then press the main power switch again. The Torque Boost mode is restricted to protect the battery meaning it can not be used several times. If the Torque Boost mode is not available after waiting for more than 10 seconds, replace the battery with a fully charged one or recharge the battery.
