

# Earn more from your **Solar System**

The most powerful energy advisor available

## Introducing **Pulse®**, your energy management system

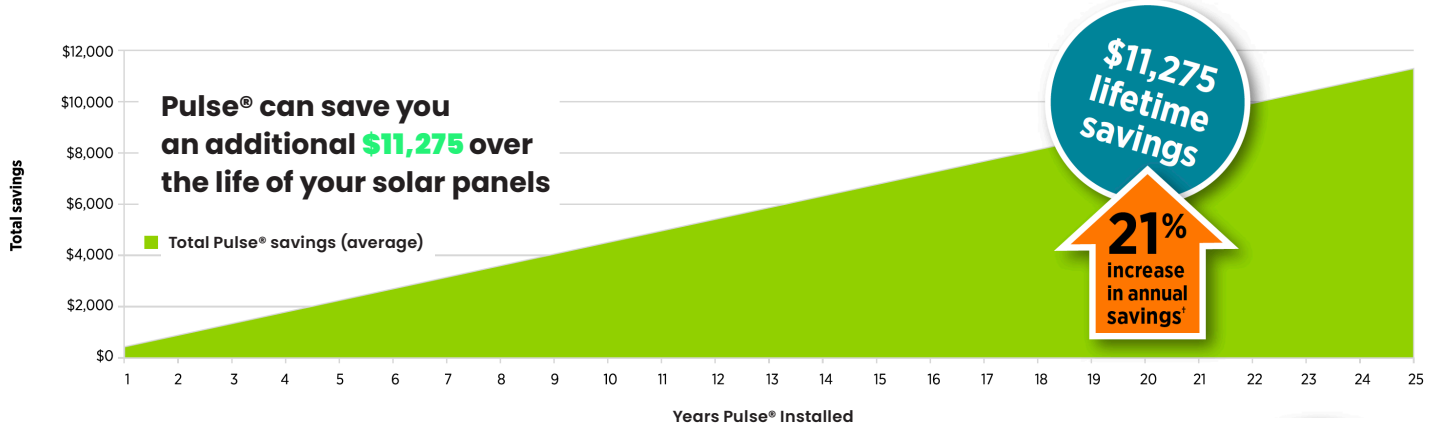

Pulse® is an intelligent in-home system that monitors and advises you how to reduce your energy costs and earn more from your solar system.

Pulse® Analytics will identify specific saving opportunities for your home that can save you hundreds of dollars each year. Pulse® can be installed as part of a new or existing solar system, or for homes considering solar to reduce their energy costs.

- ▶ Let Pulse® Analytics find you the cheapest energy plan each year based, on your unique energy usage requirements. (average \$451 saving per year)†
- ▶ Guaranteed solar outage alerts, or we'll pay for your lost solar revenue#.
- ▶ Home battery recommender – Pulse® Analytics will pinpoint when it makes financial sense to invest in a battery solution.
- ▶ Install Pulse® before installing solar and let Pulse® Analytics calculate the perfect solar system for your energy needs.
- ▶ Bill forecasting and alerts – set a budget and Pulse® Analytics will help you avoid bill shock.
- ▶ Home control of air conditioning, lights and plug loads^.
- ▶ 24/7 Live data monitoring.

# Boost your solar savings by 21% per year

Pulse® Analytics continually monitors your unique energy profile and solar system to ensure you are maximising your savings. For example, Pulse® Analytics finds the average customer \$451 in yearly savings on their electricity bill. That's an additional \$11,275 in savings over the life of your solar panels†.

## Guaranteed solar outage protection

Pulse® also provides solar monitoring. Did you know that solar system outages usually go undiagnosed for up to 4-5 months, costing you over \$600.

Pulse® guarantees to protect your solar investment by notifying you of an outage – if we don't, we'll pay you for your lost solar revenue!

## The most powerful energy advisor available

- \$500 guaranteed energy savings\*
- Always be on the best electricity plan†
- Home battery recommender
- Solar system size recommender
- Bill forecasting and alerts
- 24/7 Live data monitoring
