

LG Home Battery RESU

Don't give away your solar energy!

The smartest time to install a battery is when you install your solar system

Save money

Use your stored energy at night
Reduce or abolish electricity
bills then sell excess back to
offset your gas bill.

Blackout ready

Power through inconvenient
blackout outs. Be prepared with
your own source of power and
keep your home and family safe.

Reduce carbon footprint

Power your life with free energy
from the sun and make the
future a brighter place.

LG Home Battery

Why we love LG Home Batteries

The most innovative battery technology to power Australian's homes.

Powering innovation around the world

We've been pioneering lithium-ion battery technology for over 24 years.

That's why our batteries are used to power 3 million electric vehicles, millions of homes and beyond our world - did you know NASA spacesuits rely on our battery technology.

Compact & sleek

A sleek and compact system that integrates into your lifestyle.

The compact and sleek design of the LG Home Battery allows you to place it anywhere you want, both indoors and outdoors, on the floor or wall. Its size makes it much easier to comply with the latest battery standards.

Global leader in safety

The safety of our lithium-ion battery is why more than 3 million electric vehicles from 20 automakers rely on our battery technology.

The LG Home Battery is protected & secure from the elements but also people. With no exposed components your family is safe.

Tailor your perfect system

Maximise your solar at an affordable price by creating a bespoke premium system designed to your unique energy needs.

We have the most flexible solution in market with the widest range of battery sizes, multiple inverter compatibility options and flexibility to be installed with new solar, after solar or upgraded solar.

The solar installer's battery of choice

"The LG's are easy to install and the reliability is second to none" Reece, Total Solar Solutions.

With the largest installer network in Australia, a full local technical service team and compatible with a wide range of inverters - we are the home battery of choice by solar installers.
