

Product Safety Recall

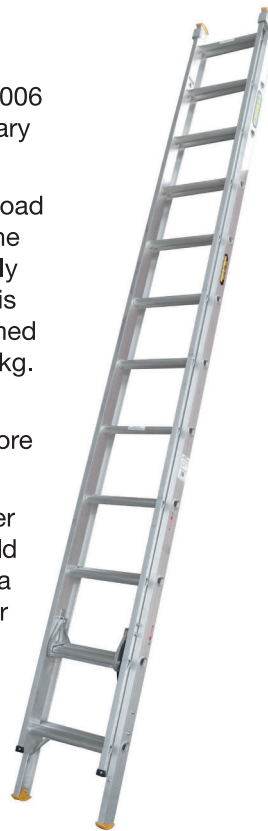

Gorilla Extension Ladder 150kg Industrial - EL12/21-I. Manufactured between December 2006 and October 2014. Available for sale from January 2007 to November 2014.

Defect: The ladder does not perform to 150kg load capacity as claimed on the packaging and on the load rating label. Consumers may mistakenly rely on the claimed load rating to assess whether it is safe for them to use. Recent testing has confirmed that the ladder should have a load rating of 120kg.

Hazard: There is a possibility of a fall injury occurring if the ladders fail while loaded with more than 120kg.

What to do: Consumers must not use the ladder for loads of more than 120kg. Consumers should contact Hartman Pacific in order to arrange for a new rating label and load rating stickers for their existing ladder, or call Customer Service if you believe that you will use the ladder with loads greater than 120kg.

Contact details: For more information or to arrange for a remedy, please contact Hartman Pacific on 1300 362 393.
